DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

With respect to polyol (b2), applicant is advised to elect one of the following species: the polyol (b2) formed by the reaction of a polyol with "dimethylamine, isopropylamine...N,N-dimethyl aminopropylamine" (Claims 8 and 9), the polyol (b2) formed by the reaction of a polyol with an acrylate or methacrylate (Claim 10), the polyol (b2) formed by the reaction of the polyol with an aminoalkyl halide (Claim 11), the polyol (b2) formed by the reaction of the polyol with a glycidylamine, and the polyol (b2) formed by the reaction of the polyol with a primary amine group wherein atleast a portion of the primary amine groups are methylated (Claim 13).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Claim 7 appears to be generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
